

# DOCA OFED driver installation on Red Hat Enterprise Linux 8.9

---

This document provides a brief description of the DOCA OFED 3.0.0 driver installation process on Red Hat Enterprise Linux 8.9 using “dnf” commands.

## **Prerequisites:**

Make sure that the distro InfiniBand drivers are not installed on your system since these RPMs will conflict with DOCA OFED RPMs. If you have setup a repository for RHEL 8.9 RPMs for your system, please execute the following command to uninstall distro InfiniBand RPMs.

**# dnf group remove “infiniband support”**

**Note:** Install python3 as a prerequisite.

## **Important:**

This repository supports the following kernel versions only:

- **4.18.0-513.5.1.el8\_9.x86\_64** or any errata kernel version that maintains kABI compatibility with this release.

## **Installation:**

Once you are subscribed to DOCA\_OFED repository, execute the following command to install DOCA OFED:

**# dnf install doca-ofed-3.0.0**

**Note:**

To load the new driver modules, either run the following command or reboot the server after DOCA OFED installation.

```
#/etc/init.d/openibd restart
```

**Uninstallation:**

In case all the DOCA OFED RPMs need to be uninstalled, execute the following command:

```
# ofed_uninstall.sh --force
```
